Aapsee Controls And Systems Pvt Ltd

Established in 2001; Specialists in Dry Leak Testing Applications. Manufacturing Leak Flow Testing Units in India. Mastered over 10 different type of Leak Testing methods applicable to Automotive, Water Purifier, Medical, Pharma, HVAC, General Engg, Food Packaging Industrial Segments. Provided solutions to over 2000 applications. Our product line Units are capable to test a simple Single Tester, to multiple method Heads capable to test up to 8 parts at a time. Offer leak/ flow testing ranges from 0.1 sccm to around 1000 slpm. Have expertise to offer solutions to around 250 parts per minute. Offer embedded data base, multiple level password control, pre-set automation controls, Poke-a-yoke for Bad Part dispensing, Bar Code SupportEase of Embedment to External Machine Controls. Special Services: Application Development, Calibration.

ANCHROM

Analytical Specialists since 1978

Anchrom Enterprises Pvt Ltd

Established 45 years ago, Anchrom has evolved into a leading company with a focus on water analysis automation, driven by a steadfast commitment to facilitating and upholding high standards of water quality in India. With a deep understanding of the critical importance of clean and safe water, Anchrom has dedicated its expertise to provide solutions for water analysis. By launching automation systems, the company aims to streamline and optimize the process of water quality assessment, enabling accurate and efficient analysis to ensure compliance with stringent standards in India.

Our Product range for water analysis

KPM AMS Alliance SmartChem Discrete Analyzer: is a wet chemistry automated analyzer that analyzes various parameters such as nitrates, nitrites, chloride, silicates, hardness, sulfides, alkalinity, hardness, etc. in matrices like soil, drinking water, waste water, surface water, beverages, soil, etc

KPM AMS Alliance ContinuousFlow Analyzer - FUTURA: is a versatile solution for testing various parameters like Ammonia, cyanide, TP determination, MBAS Surfactant determination etc. across diverse samples like sea water, soil, tobacco, and beverages. FUTURA revolutionizes lab workflows by automating intricate sample preparation tasks like dialysis, distillation, and injection, ensuring precision in parameter determination.

AS Engineers

AS Engineers, with over 25 years of excellence, is a trusted leader in fluid mechanics and drying solutions. We specialize in designing, manufacturing, and delivering cutting-edge industrial equipment tailored to diverse industries. Our commitment to innovation, quality, customer satisfaction drives us to provide robust and energy-efficient solutions.

Our product range includes Paddle/Sludge Dryers, Centrifugal Blowers, Axial Fans, Pollution Control Equipment, and Turnkey Solutions. These products are designed to optimize drying processes, improve airflow efficiency, and meet stringent pollution control standards.

We take pride in offering customized solutions that enhance operational efficiency and sustainability. Our team of experts ensures seamless project execution, from concept to commissioning. With a proven track record and a customer-centric approach, AS Engineers is your trusted partner for reliable, efficient, and innovative industrial solutions.

Asha Resins Limited

Asha Resins Limited, established in 1996 near Pune, is a trusted and leading manufacturer of ion exchange resins and water treatment chemicals in India. Under our flagship brand ASHAION®, we cater to sugar mills, water treatment plants, pharmaceutical industries, and other industrial clients both nationally and internationally. Our product portfolio includes strong and weak acid cation resins, anion exchange resins, mixed bed resins, as well as boiler and cooling water chemicals, RO chemicals, and ETP/STP treatment chemicals. We are ISO 9001:2015 certified and have successfully supplied our products to over 250 clients across India and abroad. Our state-of-the-art production facility is equipped with advanced machinery and an in-house laboratory for strict quality control, ensuring high-performance and reliable products. Committed to innovation, sustainability, and excellence, we strive to deliver solutions that meet diverse water treatment and industrial needs efficiently.

Asian Scientific Industries

Asian Scientific Industries (ASIND) Strengthening Scientific India Since 1959 Founded in 1959, Asian Scientific Industries has played a key role in advancing India's scientific infrastructure. With over 66 years of expertise, we specialize in the turnkey execution of Microbiology Labs, Pharmaceutical QC Labs, Chemical Testing Labs, BSL-I/II/III Labs, and Mobile Laboratory Units. Our modern Delhi-based facility also manufactures cleanroom furniture and a broad range of laboratory instruments designed for performance, safety, and compliance.

Driven by Visionary Leadership

Under the leadership of Mr. R.K. Kohli (MD) and Dr. Ratik Kohli (CEO), the company has scaled rapidly over the past decade.

Key National Contributions

350+ Mobile Food Testing Labs

40+ Mobile TB Detection Labs

24+ FSSAI & CFL Labs

10+ BSL Laboratories

60+ Advanced Ambulances for NHAI

Contributor to CERN's HGCAL Cleanroom

We proudly serve the Indian Army, MoHFW, FSSAI, NHAI, and various State FDAs.

Biopipe India Private Limited

Biopipe India Private Limited is a pioneering company in sustainable wastewater management, offering Indian first biological sewage treatment system that operates without chemicals, odor, or sludge. Leveraging patented technology developed internationally, Biopipe delivers a fully automated and highly efficient solution for residential, commercial, and industrial applications.

Our systems are compact, energy-efficient, and designed for decentralized treatment, ensuring zero environmental impact while meeting stringent discharge standards. With a strong presence across India, Biopipe has successfully executed projects in housing societies, institutions, and industrial estates, contributing to cleaner water reuse and reduced operational costs.

We are committed to transforming the wastewater sector through innovation, reliability, and eco-friendly practices, aligning with Indian sustainability and water conservation goals. Our vision is to provide affordable, scalable, and maintenance-free sewage treatment solutions that address the growing challenges of urban water management.

centelon

Centelon IT Solutions LLP

Centelon Robotics is proud to be part of the Centelon Group, a diversified enterprise focused on technology and technology-led transformation. Centelon works across industries and geographies, enabling governments and enterprises to transform through a blend of strategy, innovation, and execution.

Centelon Robotics is a technology-driven company specializing in IoT solutions and the development of humanoid robots. With a strong foundation in both hardware and software, we deliver end-to-end automation solutions tailored for industrial, infrastructure, and smart city applications.

Our IoT-enabled SCADA platform(Metiz)is deployed across multiple industries, with a strong focus and proven success in the water sector. We have implemented advanced monitoring and control systems for water treatment and distribution — enabling real-time data visualization, remote automation of pumps and valves, and proactive alerts for anomalies such as turbidity, pH imbalances, or borewell dry-run scenarios. These solutions have helped clients improve decision-making, enhance operational efficiency, and significantly reduce water wastage.

CNP Pumps India Private Limited

We are CNP Pumps India Pvt. Ltd. we are a leading Indian Pump Company and we offer a wide range of Quality Stainless Steel Pumps for Various Standard and Specialized Applications. Established in AUGUST 2005, we are now over a decade old and have created an impressive foot print in the Pump Industry. Our Range of Specialized Stainless Steel Pumps includes Vertical Multistage Pumps, Horizontal Multistage Pumps, Stainless Steel End Suction Pumps, Inline Pumps, VTP, Immersible Pumps, Pumps for Solar Systems, Non-clog Submersible Pumps and Micro Bubble Generators. These Pumps find applications in Industrial, Domestic, Agriculture and Water Treatment segments. We have a capacity to produce more than 3000 pumps per month and we have a complete set of precision manufacturing and inspection equipment with perfect Quality Management System and Procedure. CNP has experience in designing, developing and manufacturing of Pumps and it offers Reliable, Cost Effective and Energy Efficient Pumping solutions.

Dynamic Equipments Private Limited

Dynamic Equipments Private Limited, part of the legacy Dynamic Group (since 1976), brings decades of industrial expertise to the field of environmental engineering. Since 2019, we are delivering reliable wastewater treatment and sludge dewatering solutions fully in-house manufactured and supported by our NABL-certified lab for real-time testing, polymer advice, and performance-driven equipment selection.

Multi Disc Screw Press (MDSP): Self-cleaning, energy-efficient, ideal for high-load sludge.

Industrial Agitators: Custom-built top, side, and bottom-entry mixers for multiple industries.

Chemical Dosing Systems: Skid-mounted, automated dosing units for ETP/STP/WTP.

Submersible Mixers (Bauer): High-power mixers for wastewater and biogas.

Separators (Bauer): Robust solid-liquid separators for animal waste and biogas.

EIE Complete Solutions Pvt. Ltd.

Our journey started way back in 1996 with a thought to do our bit to save environment. Started with manufacturing & sales of plants & components for water /waste water treatment which gave birth to some renowned brands in sludge handling & environmental monitoring solutions. Later added solutions for burning issue of pollution related to AIR, WATER& SOLID Waste. Under our consolidation drive , EIECS is our latest venture catering to various environment related challenges i.e.

1. Environmental Monitoring Systems with CPCB/SPCB configuration
2. Treatment of Water/Waste Water-Recycling & Reuse & Treatment of Emission (DG Retrofit Systems)
3. Solid waste Management
4. Environmental Consulting

The company has an unbeatable professional expertise in above segments with visionary leadership, well-trained in-house staff, Training & research facility, & production units in order to further innovate and deliver the best-in-class products to customers.

Glassco Laboratory Equipments Pvt Ltd

Glassco has produced high-quality lab glassware and instruments for over 56 years, exporting to 100+ countries and employing more than 1,000 staff. Our range complies with DIN, JIS, ISO, and ASTM standards, all made at a single facility. We recently expanded to manufacture disposable glassware like test tubes, pipettes, culture tubes, and vials, with a capacity of one million pieces per day. Our scientific instruments, marketed under the DAN Logitech brand, are known for excellent design and functionality. Glassco is the first to introduce QR codes on lab glassware, allowing quick access to product details and downloadable certificates via smartphone scans. QR codes also facilitate easy website visits and product information look-up. We have partnered with Caliber Software used in over 250 pharma companies and compatible with our QR-coded volumetric glassware. We welcome custom orders and strive to meet specific customer needs efficiently.

Hindustan Bottling And Engineers

Hindustan Bottling & Engineers are reputed in manufacturing and supplying the qualitative assortment of Shrink Machine, Labeling Machine, Liquid Filling Machine, Automatic Jar Washing Machine, etc. We were founded in 2008, We are supported with the advanced infrastructure. Our infrastructural base includes various divisions such as quality testing, procurement, manufacturing, R&D; warehousing and packaging and sales and marketing. All divisions are handled by a skilled team of professionals. Due to our customer-centric approach, reasonable business policies, quick delivery and nominal price structure, we have been able to achieve maximum satisfaction for our valued customers. We have become a respected and known name in the field of water filtration equipment and batch coding machines. Furthermore, our offering, water filtration equipment, is made from high-grade raw materials, which are purchased from very reliable vendors in the market.

Jahen and Jos Scientific Solution Private

Jahen and Jos Scientific Solution Private Limited is a science-driven company specializing in advanced water and wastewater treatment technologies. Backed by rigorous research and patented collaborations including strategic partnerships with IIT Madras. We deliver innovative, results-driven solutions to meet the most demanding industrial and environmental needs.

Our Key Solutions:

- **Carbo X: OG100** : A breakthrough material engineered to treat complex (oil-water emulsion) wastewater from the automobile, forging, and refinery industries, ensuring compliance with stringent discharge norms.
- **Carbo X: HM469**: Targets and selectively removes toxic heavy metals and retain Ca, Mg, Na, and K, safeguarding ecosystems and public health.
- **Carbo X: CL069** – Specially developed for free chlorine removal from treated wastewater before passing through RO system, enabling safer discharge and reuse.
- **Mineral Water Unit with Carbo A**: A compact, spiral carbon cartridge system that eliminates channelisation and dead zones, ensuring maximum carbon utilisation. This low-maintenance, cost-efficient filtration technology delivers safe, pollution-free drinking water.

Our Mission: To provide sustainable, efficient, and science-based water solutions that empower industries and communities to achieve their water quality goals. With a strong R&D backbone, we are committed to shaping the future of clean water technologies, helping clients meet regulatory standards while advancing environmental stewardship.

Address: IITM Research Park, No.1, FA, 1st Floor, Kanagam Road, Taramani, Chennai – 600113.

Jet Vacuum Systems Private Limited

We are pleased to introduce ourselves as Jet Vacuum Systems Pvt. Ltd., based in Vadodara, Gujarat. Since 2007, we have specialized in Zero Liquid Discharge and Vacuum Technologies, serving over 1500 clients with solutions backed by 18 + years of expertise.

Our Expertise Includes:

Water and Wastewater Treatment: Multi Effect Evaporators (MEE), Effluent Treatment Plants (ETP), Reverse Osmosis Plants (RO), Agitated Thin Film Dryers (ATFD), etc.

Vacuum Systems: Liquid Jet Ejectors, Steam Jet Ejectors, Vacuum Pumps, and critical applications with 0.4 Torr suction pressure.

Crystallization Equipment: Custom crystallizers including Adiabatic Evaporation Crystallizers and Sulphuric Acid-based Crystallizers for enhanced efficiency.

We serve diverse industries, including Pharma, Edible Oil, Chemical, Fertilizer, Textile, Power Plants, Pulp and Paper, Fiber, Food and Beverages, and Steel Industries.

Our services also include design consultation, performance enhancement, system upgrades, and after-sales support, with piloting facilities for vacuum testing and evaporation

MTS Water

We (MTS WATER) are the Channel partner of VEOLIA WATER since 2004. Catering our services in North India for following range of products: R.O. ANTISCALANTS COOLING TOWER CHEMICALS BOILER WATER CHEMICALS AMC, O&M OF R.O. PLANTS MTS WATER is a leading water treatment solution provider in North India. We have an overall experience of over 3 decades in the field of water treatment technologies, however we are in the business of transferring our expertise since 2002. We deliver customer value by improving product quality, reducing operating costs and extending equipment life. We offer a broad range of products and services to optimize total water/process system performance, safeguard customer assets from corrosion, fouling and scaling, and protect the environment through water and energy conservation.

With our field engineers bringing onsite expertise, we are able to deliver value by solving our customers' most challenging problems and improving the bottom line. We discuss your strategic objectives, suggest projects that can help you meet them and quantify the impacts in terms of key business results. Few of the many benefits we deliver to our customers are:

- Improve productivity
- Increase process uptime
- Reduce waste
- Ensure sustainable results through continuous monitoring and preventative diagnostics
- Optimize equipment life & performance
- Optimize operating costs
- Improve regulatory compliance

Parahsakthy Power Technologies Private Limited

We are from M/s PARAHSAKTHY POWER TECHNOLOGIES PVT LTD and we manufacture INSTANT SOLVENT SOFTENERS (I S S) to soften the water without chemicals. Our manufacturing unit is located at Kushaiguda, Hyderabad.

This product is PATENTED in 85 countries and we have installed these INSTANT SOLVENT SOFTENERS in various Cement plants, Pharma, Dairy plants, Textiles mills and Domestic applications for avoiding scaling in the water pipelines.

Once INSTANT SOLVENT SOFTENER is installed, chemicals are not required for softening of water and no need to drain the hard water which is generated while backwash cycles. There can be huge savings on account of chemicals and reduction in water consumption which may result in saving in power consumption.

INSTANT SOLVENT SOFTENERS can be installed before the Heat Exchangers, Condensers, Chilling plants, Boilers, Dehumidification plants, Cooling Towers, RO Plants, Evaporators

Rai Carbons

We are proud to introduce 'Rai Carbons' as one of the largest manufacturers of Filter Media in central India. We are not only known for quality but also for sustainable sourcing and responsible manufacturing. We can offer the most competitive rates in the market due to our extensive investment in manufacturing infra and long-term agreements with raw material providers. We assure to provide the cleanest, greenest, and most price-competitive Filter Media in India.

Our manufacturing capability is across different bases such as wood, Bituminous Coal, Anthracite Coal, etc, and different sizes from 300 mesh powder to 4x8 mesh. Apart from this we also manufacture other filter media such as MnO₂, Silex and anthracite in various qualities and sizes. We have the sustainable capability to acid wash all kinds of bases/carbon. We use green and proprietary chemicals for raw material treatment to ensure the best quality.

We offer packaging in various ways like packing material in 25 Kg New Laminated Bags with inside Liners, which further can be pelletized or filled in jumbo bags as per requirement for export. We also offer customized packing as per requirement.

We specialize in Customization of Base, Quality, and Packaging as per requirement.

Respondent Precision Engineering Pvt Ltd

RPE: Driving Innovation in Vacuum & Pressure Solutions

Respondent Precision Engineering Pvt. Ltd. (RPE), based in Ghaziabad, Uttar Pradesh, is an ISO 9001:2015 certified leader renowned for its precision-engineered industrial equipment.

Core Competencies: Mastery in Vacuum & Pressure Systems

RPE manufactures Twin-Lobe and Tri-Lobe roots air blowers with capacities ranging from 10 m³/hr to 22,000 m³/hr, available in both air-cooled and water-cooled variants—ideal for both pressure and vacuum use.

Specialization in STP, ETP, WTP & ZLD Products.

Advanced Manufacturing & Quality Assurance Equipped with VMC, CNC, cylindrical grinding, balancing, milling, lathe, and specialized machines, RPE upholds rigorous quality standards. Blowers are tested under extreme conditions per BS 1571 Part II before dispatch.

Products & Services:

Industrial Equipment: Roots/Twin-Tri Lobe Blowers, Side Channel Blowers, Mechanical Vacuum Boosters, acoustic enclosures, sludge dewatering machines, STP/ETP equipment, truck/tractor-mounted blowers, water-cooled blowers.

Support Services: Customization, installation, training, maintenance, consulting, spare parts, and blower repair services.

Spray Engineering Devices Limited

Spray Engineering Devices Limited has developed the patented Low Temperature Evaporation Technology based on Mechanical Vapour Compression system for upto 99% % high quality clean water recovery and recycling of wastewater on minimum power consumption eliminating the usage of external Boiler, Turbines or cooling sources improving dramatically the Carbon credits. This module has wide-scale applications in industrial and domestic sectors for upto 99% recovery and recycling of water back to the process which aims not only to accomplish Zero Liquid Discharge (ZLD) but also Zero Liquid Intake (ZLI). Our Patented Low temperature Evaporation Technology requires only around 10% of the land with reduced manpower, eliminating the use of chemicals, membrane technology, RO system etc. This Low Temperature Evaporation Technology is running successfully and performing excellently in more than 120 plants globally in last 4 years for various applications like textile, dyeing, paper, pharmaceutical, chemical, RO, leather, automobiles, bleaching, leachate, oil refinery etc. across the globe.

Swan Environmental Pvt. Ltd

SWAN ENVIRONMENTAL PVT. LTD. was incorporated in 1988 with an intention to contribute to environmental protection through business. SWAN is acronym for Soil Water Air Noise. As the name suggests, SWAN offers a host of products of reputed make that can analyze and quantify soil, water, air and noise. SWAN is very selective in choosing their technology partners and gives utmost importance to proven technology and proven track record to identify their partners.

Product Portfolio:

- Continuous Ambient Air Quality Monitoring Systems (CAAQMS)
- Stack Emissions and Process Monitoring Instruments (CEMS, VOCs etc)
- Effluent Quality Monitoring Systems (EQMS)
- Water Quality Monitoring Instruments
- Environmental Hygiene & Safety (EHS) Monitoring Instruments

Services for above products like Spares, Consumables, AMC, CMC etc are also provided by SWAN. In the last 30+ years SWAN had the opportunity to serve various industrial sectors, Government Organisations, Laboratories and Institutions across India.

TDC Pharmatech Filtration LLP

“TDC Pharmatech Filtration LLP” is a leading organisation in the field of manufacturing Water & Waste Water Treatment Equipments & Solid Waste Equipments i.e

1. Sludge Dewatering Screw Press Machine
2. Polypropylene Filter Press Machine
3. Dissolved Air Flotation (DAF) System
4. Clarifier/ Clariflocculator
5. Belt Filter Press
6. Basket Type Centrifuge Machine
7. Mechanical Bar Screen
8. Belt Type Oil Skimmer
9. Organic Waste Composting machine

“TDC Pharmatech Filtration LLP” (Formerly Pharmatech Filtration Since 1994), has made a well-recognized name as a Manufacturer of ETP/STP Components & Equipments. Our Unit is based in Delhi and the organisation has a complete manufacturing setup with state of the art machines using latest technology to deliver quality products for better results and services.
